

# Corporate Racks

## Corporate Racks - TS8

The long term performance of an IT infrastructure is dependent on the coordinated interaction of individual components. With Rittal IT System server enclosures, integration of climate control, power and security solutions is simple. Innovative, modular designs maximise internal space and load bearing capacity while making the addition of new active devices and additional enclosures simple and cost effective.

Designed specifically for the data centre, the TS8 is a modern enclosure offering strength and stability for virtually any server environment. Its patented 16 fold continuously welded frame delivers 30% more dimensional stability, high load carrying and maximised internal volume.

### Design Features

- Robust welded frame structure
- Front and rear door fully vented; vented surface area > 82%
- Tool-less adjustment of mounting angles reduces equipment deployment time
- Vendor neutrality, thanks to infinite adjustment of mounting angles
- Cable entry via the roof and base
- 2-piece side panels
- Static load capacity of up to 1200 kg
- Castors and levelling feet on each model

**Material:** Mild steel

**Surface finish:** Enclosure frame: Dipcoat – primed

**Enclosure panels:** Dipcoat – primed, powder-coated

## Corporate Rack – With Side Panels

**Supply includes:** Enclosure frame TS 8 with mild steel doors front and rear, vented 82% open area, with 130° toolless quick release type hinges, rear door split type, top panel provisioned with 4 covered cable entry points, L-shaped front and rear depth-variable mounting angles each with screen printed RU positions and adjustable via toolless assembly, levelling feet, castor kit, comfort handles with security lock 3524 E with push button control, both sides have dual lockable side panels.
